Acknowledgements

The *County Study Data Book* is the result of suggestions received from the Northeast Committee on Rural Sociology and the Northeast Technical Committee for Regional Project No. 31, "The Effects of Urban Industrial Expansion on Agriculture in the Northeast." Both committees are composed of staff members of college and university agricultural experiment stations in the Northeast.

The author acknowledges the careful attention given by Mrs. Mary E. Templeton, Research Assistant of the Department of Agricultural Economics and Rural Sociology, in preparation of the numerous tables, and to Mary Chico, Sandra Morrisette, and Donna Mallow, statistical clerks in the Department.

The author wishes to express his appreciation for the help and suggestions of The State Department of Health, Dr. N. H. Dyer, Director, and to the following members of staff and Boards — Paul D. Bibbs, Paul B. Shanks, Harry M. Huff, Dr. A. Brooks Drake, Gilbert Brooks, and Marjorie E. Dumez, R.N.; to Dr. Craig Wilson, Kathleen Kerwood, and Sherril D. McMillen of the State Department

of Education; to John T. Johnson, Commissioner of Agriculture, and Thomas L. Cryer and Alan R. Miller of the Federal-State Crop Reporting Service; to Joseph N. Finerty, Research and Statistical Division, and to Charles J. Parsons, Morgantown office, Department of Employment Security; to Robert R. Cline, Division of Research and Statistics, Department of Public Assistance; to Captain R. E. Schnell, Criminal Investigation Bureau, Department of Public Safety; to Richard Shelton, Assessments and Levy Division, State Tax Commission; to Jones Kelly, Bureau of Vehicles Division, Department of Motor Vehicles; and to Harry C. Schwender, Monte C. Catlatte, and Robert A. Wilson, State Road Commission.

Others who have contributed to the information in the *County Study Data Book* are Earle L. Elmore, Managing Director of the West Virginia Chamber of Commerce; James A. Thompson, Director of the West Virginia University Bureau of Business Research; and Eugene Elkins, Senior Research Analyst, West Virginia Bureau for Government Research.

Preface

AMERICAN society is organizing to secure the full benefits of the development of scientific knowledge and its application to the solution of practical problems. The division of labor needed for the understanding and use of specialized knowledge and techniques have increased the complexity of our national, state, and local life. These differentiations in employment have affected all aspects of our lives: manufacturing, transportation, communication, government, education — to mention only a few.

The rapid tempo of changes and their impact upon personal and social adjustment continue, with no definite signs of abating. In a society committed to democratic values, the scope and significance of these changes place the intelligent and concerned citizen in urgent need of information — information which can contribute to his understanding and intelligent participation in the solution of difficult public problems.

There are no blueprints of the design of the future. The continual emergence of new knowledge which needs to be absorbed forbids a solidification of "just what we want." Analyses at national, state, and local levels, however, recognize the potentials of the future, implied in our new knowledge and increased capabilities, and suggest specific goals or specific directions.

The discernment of these goals and the decisions as to the ways in which they may be achieved have become too important and, perhaps, too difficult, to be accomplished without wide-spread knowledge of the needs implied. The gains to be secured for the enrichments of human life are too great to discourage alert and concerned citizens from participating in the enterprise.

The belief in a full recruitment of concerned citizens, who will set themselves to the task of improving human conditions, has been incorporated into national policy of the Rural Areas Development Program. The pattern of Rural Areas Development implies that the professional person does not have the complete answers — he must rely, in part, on the informed and self-disciplined citizen for assistance in making decisions. These most valuable resources, human minds and commitments, must be fully utilized if we are to make wise judgments as to our goals and the steps by which these goals may be reached.

COUNTY STUDY DATA BOOK

Measures of Social Change in West Virginia

Introduction

THE *County Study Data Book* should be useful to individuals and to local citizen groups in arriving at conclusions relative to schools and other phases of community life in West Virginia. It also may help in evaluating such statements as that recently made by the president of a statewide organization of school board members, who said " . . . contrary to what many people would have us believe, West Virginia is not regressing."

On-the-spot knowledge of events and conditions are a prerequisite to any meaningful interpretation of these data at the local level. Part of this "on-the-spot knowledge" may be common knowledge among local citizens. A pooling of other information may supply additional insights as to what is needed in interpretation and goal selection.

This publication gives specific data on a time-series and an index basis of social change, and is the result of studying the reports of the public and private state agencies. As the data are used, they should provide guide lines for requesting additional data or procedures for their analyses. The aim in suggesting this additional work at the local level would be to secure a more accurate picture through which more sound judgements could be made. For example, a study of "drop outs" from high schools may be a topic with which local citizens would concern themselves. The data, presented in this book, are only preliminary to an adequate understanding of the topic.

Since the justification for this book is its usefulness to local groups, subsequent issues will have increased usefulness only as local groups share their experiences. Some of the measures of social change reported herein may be dropped, whereas others, if requested, may prove to be more useful to such groups in their planning.

Presentation of Data

In presenting the data, an attempt was made to secure comparable data for the years 1940, 1950, and 1955-1960. It is believed that these will give sufficient depth historically and will indicate the current direction of change.

The year 1950, a census year, was used for the index base of 100. The use of the index facilitates comparisons through time, and with the State as a whole and with other counties. These comparisons are believed to be those most desired. Comparison with regional or national averages will entail heavy expenditures of research time, but may become necessary.

As financial data were introduced, the dollars were adjusted by the wholesale commodity index (1947-1949 = 100) with the expectation that the financial data would then be more representative of its purchasing power of goods and services. Much of the fiscal data is based on budget years ending on June 30. The following table contains the adjustments which were used in calculating data.

Indicies Used in Adjusting Financial Data

Year	U.S. Wholesale Commodity, Index Year Ending Dec. 31	Commodity Index Year Ending June 30
1940	51.1	50.8
1947-1949	100.0	100.0
1950	103.1	98.4
1955	110.7	110.1
1956	114.3	112.2
1957	117.6	116.2
1958	119.2	118.7
1959	119.4	119.4
1960		119.4

Some "per capita" data are given. The discrepancies between the 1960 final census total for the counties and "Estimates" for the immediately preceding year indicated that tests of methods were desirable. These tests are now being made, with the Bureau of Census cooperating. When completed, revised county totals for the years used will then be available. These totals will make more realistic comparisons possible.

Section I

POPULATION AND VITAL STATISTICS

Table	Page
1A Decennial Census Reports of the Numbers of Inhabitants for the Counties of West Virginia, 1900-1960	6
1B Index of Population for the Counties of West Virginia, 1900-1960, 1950 = 100	7
2A Population Data for the Counties of West Virginia: Census of Population 1940, 1950 and Estimates for 1955-1958	8
2B Index of Population Data for the Counties of West Virginia: Census of Population, 1940, 1950 and Estimates for 1955-1958, 1950 = 100	9
3A Births (Adjusted for Underregistration) by Place of Residence for the Counties of West Virginia, for Specified Years	10
3B Index of Births (Adjusted for Underregistration) by Place of Residence for the Counties of West Virginia, 1950 = 100	11
3C The Crude Birth Rate for the Counties of West Virginia	12
3D Index of Crude Birth Rate for the Counties of West Virginia, 1950 = 100	13
4A Deaths by Place of Residence for the Counties of West Virginia for Specified Years	14
4B Index of the Number of Deaths by Place of Residence for the Counties of West Virginia, 1950 = 100	15
4C The Crude Death Rate for the Counties of West Virginia	16
4D Index of Crude Death Rate for the Counties of West Virginia, 1950 = 100	17

TABLE 1A. DECENNIAL CENSUS REPORTS OF THE NUMBER OF INHABITANTS
FOR THE COUNTIES OF WEST VIRGINIA, 1900-1960

Data for 1900 and 1910 were taken from Table 1, Supplement for West Virginia, page 674, of the 13th Census of the United States.

Data for 1920, 1930, and 1940 were taken from Table 3, Population, First Series, Number of Inhabitants, West Virginia, 16th Census of the United States.

Data for 1950 were taken from Table 5, Volume II, Characteristics of the Population, Part 48, West Virginia, of the 1950 Census of Population.

Data for 1960 were taken from Table 6, Number of Inhabitants, PC (1), 50A, West Virginia, United States Census of Population, 1960.

Bul. No. 464

TABLE 2A. POPULATION DATA FOR THE COUNTIES OF WEST VIRGINIA:
CENSUS OF POPULATION 1940, 1950 AND ESTIMATES FOR 1955-1958

Data for 1940 and 1950 were taken from Table 5, Volume II, *Characteristics of the Population, Part 48, West Virginia*, of the 1950 Census of Population. The estimates of population for 1955-1958 were prepared by the Department of Agricultural Economics and Rural Sociology, College of Agriculture, Forestry, and Home Economics, West Virginia University, following a recommended procedure of the Bureau of Census, United States Department of Commerce. This method is known as "Migration and Natural Increase, Method II."

The 1960 Census of Population's final count indicates that these data should be revised. The Department of Agricultural Economics and Rural Sociology is cooperating with the Bureau of the Census in applying several techniques to migration and vital statistics data which, it is hoped will provide a method for increasing accuracy. These techniques will be tested by the decennial census.

Section I
POPULATION AND
VITAL STATISTICS

TABLE 3A. BIRTHS (ADJUSTED FOR UNDERREGISTRATION) BY PLACE OF RESIDENCE FOR THE COUNTIES OF WEST VIRGINIA FOR SPECIFIED YEARS

The number of births is taken for the respective years from *Vital Statistics of the United States*, published by the National Office of Vital Statistics of the United States Department of Health, Education, and Welfare or from photostatic copies (for more recent years) of reports furnished by the West Virginia Department of Health. The 1940 figures are adjusted for underregistration in accordance with the special data furnished by the National Office of Vital Statistics for use in preparing the net migration data.

The 1950 figures are the data adjusted for underregistration in accordance with *Vital Statistics, Special Reports*, Volume 39, No. 4, *Birth Registration Completeness in the United States and Geographic Area*, published by the National Office of Vital Statistics. The 1955 and following birth data are based on the 1950 findings but with adjustments for improvement, chiefly through increased use of hospital for maternity cases.

TABLE 3C. THE CRUDE BIRTH RATE FOR THE COUNTIES OF WEST VIRGINIA

Data in this table were computed by dividing the data in Table 3A, this section, by those in Table 2A, this section, and multiplying the quotient by 1,000. This is standard procedure for developing the crude birth rate. The results may be interpreted as the number of births per 1,000 population for the given geographic area.

TABLE 3D. INDEX OF CRUDE BIRTH RATE FOR THE COUNTIES OF WEST VIRGINIA, 1950 = 100

The changes indicated by this index may be the results of an increase or decrease in the number of births for the number of women of child-bearing age or an increase or decrease in the relative number of women (of child-bearing age) due to migration.

TABLE 4A. DEATHS BY PLACE OF RESIDENCE FOR THE COUNTIES OF WEST VIRGINIA FOR SPECIFIED YEARS

The number of deaths is taken, for the respective years, from *Vital Statistics of the United States*, published by the United States Department of Health, Education, and Welfare or from photostatic copies (for recent years) of reports furnished by the West Virginia Department of Health. No adjustments were made on the reported number of deaths.

TABLE 4C. THE CRUDE DEATH RATE FOR THE COUNTIES OF WEST VIRGINIA

Data presented here were computed by dividing the data in Table 4A, this section, by the data in Table 2A, this section, and multiplying the results by 1,000. This is standard procedure for developing crude death rate and may be interpreted as the number of deaths per 1,000 inhabitants of a given geographic area.

TABLE 4D. INDEX OF CRUDE DEATH RATE FOR THE COUNTIES OF WEST VIRGINIA, 1950 = 100

Changes indicated in this index may be the results of a change in the proportion of persons having entered the older age brackets due to increased longevity, or change in the proportion due to the migration influence.

1A Total Assessed Valuation (in Millions of Dollars) of all Properties of all Classes of the Counties of West Virginia	20
1B Total Assessed Valuation (in Millions of Dollars, Adjusted by the Wholesale Commodity Index) of all Properties of all Classes of the Counties of West Virginia	21
1C Index of Assessed Valuation (Adjusted by the Wholesale Commodity Index) of all Properties of all Classes of the Counties of West Virginia, 1950 = 100	22
1D Index of Assessed Valuation (Adjusted by the Wholesale Commodity Index) of all Properties of all Classes of the Counties of West Virginia, 1930 = 100	23
1E The Relationship Between Total Assessed Valuation of all Properties of all Classes and the Total Personal Income for the Counties—the Relationship is Expressed as the Number of Dollars of Assessed Valuation to the Number of Dollars of Personal Income	24
1F Index of the Relationship Between Total Assessed Valuation of all Properties of all Classes and Total Personal Income for the Counties, 1950 = 100	25
2A Total Expenditure (in Thousands of Dollars) Made by County Governments in West Virginia	26
2B Total Expenditures (in Thousands of Dollars, Adjusted by the Wholesale Commodity Index) Made by County Governments in West Virginia	27
2C Index of Total Expenditures (Adjusted by the Wholesale Commodity Index) Made by County Governments in West Virginia, 1950 = 100	28

TABLE 1A. TOTAL ASSESSED VALUATION (IN MILLIONS OF DOLLARS) OF ALL PROPERTIES OF ALL CLASSES OF THE COUNTIES OF WEST VIRGINIA

The data presented in this table are taken from the West Virginia Blue Book, and the annual reports of the State Tax Commissioner of West Virginia. In this particular table, the 1930 data is added so as to give information previous to the adoption of the "Tax Limitation Amendment" in 1932.

TABLE 1E. THE RELATIONSHIP BETWEEN TOTAL ASSESSED VALUATION OF ALL PROPERTIES OF ALL CLASSES AND THE TOTAL PERSONAL INCOME FOR THE COUNTIES - THE RELATIONSHIP IS EXPRESSED AS THE NUMBER OF DOLLARS OF ASSESSED EVALUATION TO THE NUMBER OF DOLLARS OF PERSONAL INCOME

Data presented here were computed by dividing the data in Table 1A, Section II, by the data in Table 1A, Section VIII. Personal income data by counties for 1930 are apparently not available.

TABLE 2A. TOTAL EXPENDITURES (IN THOUSANDS OF DOLLARS) MADE BY
COUNTY GOVERNMENTS IN WEST VIRGINIA

Data in this table are based upon two sources. They are Report of Trend in Costs of Marketing Ordinary Functions of County Government in West Virginia for the Twenty-Two Year Period 1937-1958, published on August 16, 1958 by the West Virginia Chamber of Commerce, and Municipal and County Budgets in West Virginia, 1958-1960, written by Claude J. Davis, Eugene R. Elkins, and Paul E. Kidd and published by the West Virginia University Bureau for Government Research.

TABLE 1A. THE TOTAL AMOUNTS (IN THOUSANDS OF DOLLARS) FOR THE WELFARE PROGRAMS AS ALLOCATED, IN THE ANNUAL REPORTS, TO THE COUNTIES BY THE STATE DEPARTMENT OF PUBLIC ASSISTANCE

The amounts listed below contain all the transfer payments of the federal, state, and local governments and administrative and casework programs allocated to the counties.

Some state and federal funds, in the amount of four million dollars (1958), are not allocated as a budget procedure to the counties. No value has been assigned to assistance received in

the form of commodities, nor are amounts expended by private welfare groups included. To obtain a comprehensive view of welfare programs in the counties, the additional sources should be taken into account.

TABLE 1D. A COMPARISON BETWEEN THE TOTAL EXPENDITURES FOR WELFARE IN THE COUNTIES OF WEST VIRGINIA AND THE TOTAL PERSONAL INCOME OF THE COUNTIES OF WEST VIRGINIA - TOTAL EXPENDITURES FOR WELFARE IS REPRESENTED AS PERCENTAGES OF THE TOTAL PERSONAL INCOME

The amounts considered in the data presented below contain all transfer payments of the federal, state, and local governments and administrative and casework programs allocated to the counties.

The amounts contain only those state funds allocated to specific county units. Some welfare funds are not allocated, as a budget procedure, to the counties but are used for the benefit of

people in the counties. No values have been assigned to commodities made available by the Federal government and distributed through State and local facilities, nor are amounts expended by private welfare groups included. In order to secure a comprehensive view of welfare programs in the counties, these additional sources should be considered.

TABLE 2A. THE TOTAL AMOUNTS (IN THOUSANDS OF DOLLARS) OF
TRANSFER PAYMENTS OF ALL PUBLIC WELFARE PROGRAMS AS ALLOCATED,
IN THE ANNUAL REPORTS, TO THE COUNTIES BY THE
STATE DEPARTMENT OF PUBLIC ASSISTANCE

The data presented here were taken from the Annual Report of the Department of Public Assistance, State of West Virginia. The total amounts consist of state and federal monies in such programs as Aid to the Blind, Aid for Dependent Children, Aid to Totally and Permanently Disabled, Public Assistance, and the County's General Relief Program. These amounts do not include any value for surplus commodities provided by the federal government to certified recipients.

EDUCATION

Table	Page
1A The Total Amounts (in Thousands of Dollars) Expended for Public School Education in the Counties of West Virginia	44
1B A Moving Average of Total Expenditures (in Thousands of Dollars, Adjusted by the Wholesale Commodity Index) for Public School Education in the Counties of West Virginia	45
1C Index of the Moving Average of Total Expenditures (Adjusted by the Wholesale Commodity Index) for Public School Education in the Counties of West Virginia	46
2A A Comparison of the Total Expenditures for Public School Education in the Counties of West Virginia and the Total Personal Income: Expenditures are Given as a Percentage of Total Personal Income	47
2B Index of a Comparison Between Total Expenditures for Public School Education in the Counties of West Virginia and the Total Personal Income in the Counties of West Virginia, 1950 = 100	48
3A The Expenditures (in Thousands of Dollars) for Instructional Purposes in the Public Schools in the Counties of West Virginia	49
3B The Expenditures (in Thousands of Dollars, Adjusted by the Wholesale Commodity Index) for Instructional Purposes in the Counties of West Virginia	50
3C Index of the Expenditures (Adjusted by the Wholesale Commodity Index) for Instructional Purposes in the Counties of West Virginia, 1950 = 100	51
4A Average Daily Attendance in Public Schools in the Counties of West Virginia	52
4B Index of the Average Daily Attendance in the Public Schools in the Counties of West Virginia, 1950 = 100	53
5A The Relationship Between Number of Sophomores of the Previous Years to the Number of Juniors of the Specified Year Enrolled in High Schools for the Counties of West Virginia: The Relationship is Expressed as the Percentage of Juniors to Sophomores	54
5B Index of the Relationship Between the Number of Sophomores of the Previous Year to the Number of Juniors of the Specified Year Enrolled in High Schools for the Counties of West Virginia	55

TABLE 1A. THE TOTAL AMOUNTS (IN THOUSANDS OF DOLLARS) EXPENDED
FOR PUBLIC SCHOOL EDUCATION IN THE COUNTIES OF WEST VIRGINIA

Data presented in this table were compiled from the Annual
Report of the State Superintendent of Free Schools.

TABLE 2A. A COMPARISON OF THE TOTAL EXPENDITURES FOR PUBLIC SCHOOL EDUCATION IN THE COUNTIES OF WEST VIRGINIA AND THE TOTAL PERSONAL INCOME: EXPENDITURES ARE GIVEN AS A PERCENTAGE OF TOTAL PERSONAL INCOME

Data for this table were obtained by dividing the data in Table 1B of this section by the data of Table 1B of Section VIII and multiplying by 100.

The educational "enterprise" in many West Virginia counties is the greatest single enterprise of the county, employing the largest number of people and making the largest expenditures.

TABLE 4A. AVERAGE DAILY ATTENDANCE IN PUBLIC SCHOOLS IN THE
COUNTIES OF WEST VIRGINIA

Data presented in this table are taken from the annual reports of the Superintendent of Free Schools. Annual changes in Average Daily Attendance may come from several sources - first, the migration of children of school age; second, from the increased length of the school year; third, from changes in the beginning age; and fourth, from an increase in the size of the entering age group compared with the terminal age group based on variation in the birth rate.

TABLE 5A. THE RELATIONSHIP BETWEEN NUMBER OF SOPHOMORES OF THE PREVIOUS YEAR TO THE NUMBER OF JUNIORS OF THE SPECIFIED YEAR ENROLLED IN HIGH SCHOOLS FOR THE COUNTIES OF WEST VIRGINIA: THE RELATIONSHIP IS EXPRESSED AS THE PERCENTAGE OF JUNIORS TO SOPHOMORES

These data may be interpreted, with caution, as a measure of the holding power of the high schools. The comparison is narrowed to a specified year with its preceding year in order to eliminate as nearly as possible the effects of migration. Even with this one-year span, the 1940 records for Cabell and Kanawha counties reveal values of 102.3 and 101.2, demonstrating the influence of the migration factor.

Since there is considerable migration, local studies involving

personal knowledge of migration and student attendance are needed if an accurate picture is to be obtained.

An examination of other grade levels reveal losses, but these in most cases are proportionally less than between the Junior and Sophomore classes. It should be remembered that some students in these grade levels may be exhausting the benefits formal education holds for them.

TABLE 2A. NUMBER OF PERSONS LOCATED IN THE COUNTIES OF
WEST VIRGINIA, LICENSED TO PRACTICE MEDICINE

Persons licensed to practice medicine in West Virginia include medical doctors and osteopaths. Sources for the data presented here are the American Medical Directory, reports of The Medical Licensing Board of West Virginia, and the West Virginia Board of Osteopathy. Adjustments as to date and availability of licensee were occasionally required. Discussion of the procedures

used in making such adjustments will be provided, if requested.

NOTE: In certain instances doctors were reported from cities that are located in two counties. In these cases, the doctors were credited to the county in which the greater portion of the city's population is located.

TABLE 3A. NUMBER OF REGISTERED DENTISTS LICENSED TO PRACTICE
DENTISTRY IN WEST VIRGINIA, BY COUNTY OF RESIDENCE
FOR THE COUNTIES OF WEST VIRGINIA

In a few instances, such as in the case of Huntington, the city occupies area in more than one county. In these cases, the dentists were all credited to the county in which the major portion of the city's population is located. As was the case when compiling Table 2A, Section V, it is the intention of the author to report the availability of the practitioner to the general public in the counties. It is expected that improvement in this regard will be possible in subsequent publications.

TABLE 4A. THE NUMBER OF REGISTERED NURSES LOCATED IN THE
COUNTIES OF WEST VIRGINIA

Data presented in this table are based upon information supplied by the Board of Examiners for Registered Nurses, Marjorie E. Domez, R.N., Executive Secretary.

Nurses reported from cities occupying area in more than one county were credited to the county in which the major portion of that city's population was located.

Table	Page
1A The Total Milk Production (in Thousands of Pounds) for the Counties of West Virginia for Specified Years	68
1B Index to Total Milk Production for the Counties of West Virginia for Specified Years, 1954 = 100	69
2A Total Egg Production (in Thousands) for the Counties of West Virginia for Specified Years	70
2B Index of Total Egg Production for the Counties of West Virginia for Specified Years, 1950 = 100	71

TABLE 1A. THE TOTAL MILK PRODUCTION (IN THOUSANDS OF POUNDS)
FOR THE COUNTIES OF WEST VIRGINIA FOR THE SPECIFIED YEARS

The data presented in this table were taken from C. R. Bulletin No. 3, *Agricultural Statistics, West Virginia - 1960*, a publication of the Agricultural Marketing Service of the United States Department of Agriculture and the West Virginia Department of Agriculture. Earlier editions of this publication were also used. Much additional agricultural data, by county on an annual basis, may be found in these volumes.

TABLE 3C. THE PERCENTAGES OF TOTAL MILEAGE IN ROADS CLASSIFIED AS "HIGH TYPE" ROADS FOR THE COUNTIES OF WEST VIRGINIA

The information presented in this table was secured by dividing the data presented in Table 3A, of this section by the data presented in Table 3B of this section and multiplying the results by 100.

TABLE 5A. THE NUMBER OF MILES OF "HIGH TYPE" ROADS PER 100
SQUARE MILES OF AREA FOR THE COUNTIES OF WEST VIRGINIA

The information presented here was computed by dividing the data presented in Table 2A, Section VII, by the areas of the counties and multiplying the quotient by 100.

TABLE 1A. PERSONAL INCOME (IN THOUSANDS OF DOLLARS)
FOR THE COUNTIES OF WEST VIRGINIA

The data presented in this table is from data published by the West Virginia Chamber of Commerce in *Personal Income and Retail Sales in West Virginia by Counties for 1958 and other years*.

As indicated in these publication, "personal income" is a measure of receipts of individuals derived in the main from these sources: (a) wages and salaries; (b) other labor income such as employer contributions to private pensions, health, welfare, and

injury funds; (c) proprietor's income which includes net business earnings of farmers, unincorporated enterprises, cooperatives, etc.; (d) property income, consisting of rents, royalties, dividends, interest, etc., and (e) transfer payments such as pensions, relief, employment, and old-age benefits, also miscellaneous income such as contributions, cash prizes, consumer bad debts, etc.

TABLE 2A. RETAIL SALES (IN THOUSANDS OF DOLLARS) FOR THE
COUNTIES OF WEST VIRGINIA

These data are based upon the estimates of the West Virginia Chamber of Commerce as published in *Personal Income and Retail Sales in West Virginia by Counties* for 1958 and other years. As this publication indicates, estimates of West Virginia retail sales are based largely on reports of collections from the State's Consumer Sales Tax. It should be pointed out that retail sales

are associated to a considerable extent with the business districts of towns and cities. County and state boundary lines may be ignored by retail customers when distances to retail centers are shorter or where the variety of offering is greater.
